Subject: Secretary-reviewed oil & gas response letter

Jeremy:

Secretary Regan approves content and reprioritized format to put geology, ecology, fisheries and military first. I should have a briefing on public comments soon. Saw you deleted references to energy laws – I accepted – but consider the RFI requested the Governor specify the laws and policies applicable to O&G development. If you don't want them in the DEQ letter, maybe add them to Gov's cover letter.

It also occurred to me that we never circled back on local governments needing to send comments to Governor first before submitting to BOEM.
